14.04. Meeting Minutes of RFS PAC Last Socialization

Question:
- Mr. Misnawi
  1. What is a legal umbrella for the limited production forest (HPT) located in Sumber Klampok Village?
  2. Some activities have been implemented by Sumber Klampok Village but have not been documented by the Bali Barat National Park yet.
  3. Synergy among stakeholders of the Bali Barat National Park needs to actualized and the respective stakeholder's responsibility needs to be clear.

- Mr. Citra, KSDA Station of Bali
  1. The KSDA Station of Bali has controlled the circulation of protected animals.
  2. The KSDA Station of Bali is ready to coordinate with related government agencies, both the Police and the Bali Barat National Park, concerning the circulation of illegal logs and protected animals.

Response:
- Mr. Samiarto Aji
  1. The previous focus group discussions did not identify the land ownership while conflicts often happen due to activities in the entrance to the Bali Barat National Park area.
  2. Two kinds of approaches were undertaken by the Bali Barat National Park and so did direct communications with local communities.
  3. With regard to zoning, zones can be changed but the urgency of the land use and boundaries of such zones within Bali Barat National Park area should be taken into consideration.
  4. Basically, existing zones within the National Park area have been properly established where communities have made live green fences between their lands and the National Park area.
  5. The legal umbrella for limited production forest (HPT) will be asked to the relevant agency, viz. the Forestry Office.

- Mr. Djarot
  1. The Bali Barat National Park covers a 19,000-ha area.
  2. He explained about eligible and ineligible forest cover.
  3. Disturbed forest areas need to be periodically mapped in order to know where places to be patrolled.

- Prof. Bismak
  1. The zoning approach in national parks is dynamic and it has been shown in Bali Barat National Park.
  2. The pasture zone is an interesting issue.
  3. Roads to construct need to be approved first by the related agency because of the conformity with their functions.
4. Existing programs may be integrated with social activities in villages adjacent to the buffer zone.
5. How can the law enforcement be actualized in the National Park area?
6. In the limited production forest (HPT), for example, the HKN (community forest) program has been implemented where communities felt its benefits.
7. The program should be synchronized with those of local governments, Forest Management Unit (KPH), etc. for the interest of communities.
8. The National Park has a separate authority in its management.

❖ Chief of KPH
1. With regard to land problems in Sumber Klampok, there was a sort of co-management in 1993 where communities were allowed to manage lands within the production forest in 5 years. As stipulated in the long-term development plan (RPJP), pursuant to the directive of Governor of Bali, any limited production forest although having status of a permanent production forest is treated as a protected forest.
2. In Sumber Klampok, a Eucalyptus plantation forest of 150 ha and a mill will be built in 2017. With regard to the legal umbrella for HPT, there are still different perceptions among directorate generals to be clarified.
3. Should Sumber Klampok villagers act as forest observers or be responsible for their own cultivated areas?

❖ A village head
1. *Pura* (Hindu worshipping places) within the National Park area have been identified by the National Park.
2. A *pura* in Banyuwedang has been certified.

❖ Chief of the Port Safeguarding Unit (KP3) of Gilimanuk
1. Understanding on contents of the National Park needs to be continually disseminated to stakeholders.
2. Regarding roads, functions of patrol tracks or existing roads within the National Park area have to be reviewed.
3. Relevant regulations must be made clear.
4. Zoning for tourism, the place of interactions between humans and animals existing in the National Park area, must be made clear.

❖ Response:
- Ms. Diah
  1. She agrees with the suggestion of the Chief of KP3 of Gilimanuk on training of related parties, both the Police and communities.

- Mr. Samiarto Aji
  1. Forest Management Unit (KPH) is the outermost part or the buffer of National Park for protecting the Park.
  2. Consultation or human approach is far better than a repressive approach.
3. It is encouraged to gradually change the forest safeguarding method to a human approach with local communities.

- Prof. Bismak
  1. KPH’s existing programs in supporting the management of the National Park (as reported by the Chief of KPH) is appreciated.
  2. The Bali Barat National Park has prepared a work plan for the next five years.

Rapporteur, 
Chief of Administrative Subdivision

Ganeswor Untoro, S.E.
